

Spencer Sorcery on Magic Gas

“We’ll know our disinformation program is complete when everything the American public believes is false” ~ William Casey, CIA Director, 1981

We live in a false paradigm reality bounded by faux science, fake history, filtered news, financed by a fiat currency and directed by Demonic Warlords. Monarch/monopolists have been at war with meritocracy, Truth and humanity for eternity. Today six monopolies own 1500 newspapers, 1100 magazines, 9000 radio stations, 1500 TV stations, 2400 publishing companies and control 95% of the entertainment (programming) industry. The near total information hegemony is maintained by a false dichotomy, explained in the political context in “Divide & Conquer, the Left/Right Fraud” by James Corbett in a ten minute video on YouTube.

Science presents a dilemma for plutocrats, as empirical evidence conflicts with imposed, agenda driven orthodoxy and technology depends on accurate knowledge of reality. Constructing a deceptive narrative relies on appeals to controlled authority, or if challenged, a rigged debate between two controlled opposition players. Elitists created a debt based, fiat monetary system and after removing the Gold standard, planned on indexing to a presumed finite resource, Hydrocarbon energy for continued inflation based economy. One cannot fairly discuss today’s defective science without addressing these political roots.

The elitist controlled US Geological Service has stated that petroleum was a finite resource since the first 200 foot deep well was drilled in Pennsylvania in 1859. The concocted “fossil fuel” fable was perpetrated by Rockefeller while he monopolized 90% of US oil production and installed his cousins Teddy and FDR as president, then his cousins John and Allen Dulles as Secretary of State and Director of the CIA. To exert total energy control, elitists then concocted the triad of Carbon frauds, adding climate change and ‘sustainable’ energy [1] to the fossil fuel fraud [2]. The rigged, three sided FAKE debate on Carbon forcing has been the subject of analysis by an expanding group of scientists, known as the Slayers, who are exposing the false dichotomy of the Alarmist BIG and Luke LITTLE positions on climate change. A brief history of this fake debate is in “Lukewarm Lemmings and the Lysenko Larceny” at the FauxScienceSlayer website.

Offhand remarks about greenhouses by Jean-Baptiste Fourier have led the Alarmists to claim him as ‘father of the Greenhouse Gas Hypothesis’ [3]. In this same report Fourier claims all volcanism is due to ‘original heat of origin’, but since there would be no periodic table, Laws of Thermodynamics or model of the atom for over fifty years, Fourier can be forgiven for his speculation. Other Alarmist credit Svante Arrhenius as the hoax father, but he was quickly discredited by Knut Angstrom [4] and in 1909 Professor Robert Woods of Stanford proved that NO greenhouse can capture radiant energy. The Carbon forcing fraud was revived with federal funding under Big Bush beginning in 1988. The last year of GAO records in 2014 indicate an annual expense of \$12 billion to fund this fraud.

After years of careful research, my first major web post was “Hoax of the Century” at InfoWars in April 2009. I have since written over a hundred articles on the present, multilevel science fraud. In July 2010, Dr Roy Spencer wrote a silly article on ‘Yes Virginia, Cold Makes Hot’ and I replied with “Rocket Scientists Need Not Apply” posted at Canada Free Press. Roy never responded to my rebuttal. In August 2014, Dr Pierre Latour, PhD Chemical Engineering wrote, “No Virginia, Cooler Objects Do Not Make Warmer Objects Warmer Still” using classical Thermodynamics, a rebuttal to which Roy never replied. In a recent email thread I mentioned that the average thunderstorm weighed 16,500 ton, per Wiki/Thunder_Storms to which Roy replied....

“OMG another strawman, Joe? Besides you do not understand buoyancy (the thermals and the water vapor they contain are “positively” buoyant....like wood, which has mass, floating in water, and I have no idea what this has to do with the GHE debate anyway”

Per Wiki/Lightning_Detection thunder clouds....

“Eventually the mass of raindrops is too large to be sustained by the updraft and they fall to the ground....intra-cloud (IC) lightning occurs 5 to 30 minutes prior to cloud-to-Earth (IG) occurs. Updrafts in convective cells starts to become electrified when it reaches altitudes sufficiently cold that mixed phase hydro-meters (water, ice) can exist in the same volume. Updraft continues until all liquid water is converted to ice which releases Latent Heat.”

Latent Heat of Vaporization removes 2,257 KJoules/Kg of heat from the surface of the ocean, and from the solar facing and lower altitude surfaces of clouds. This heat is then released at altitude by Latent Heat of Condensation. Latent Heat of Solidification removes another 334 KJoules/KG to form hail, sleet or snow as described in “Science Goes Over-Under, Inside-Out” [5]. In this same email thread I mentioned Roy and his stonewalling of Dr Laour, and sent a CV which includes Dr Latour’s impressive achievements. Roy Spencer was born in 1959. In 1967, while Roy was completing grade school, Dr Latour was a US Army officer assigned to the Apollo mission and was Chief of the Simulation Branch in charge of the thrust calculations for launch, landing and return. Dr Latour holds multiple patents on refinery processes where Carbon Dioxide is both a reactant and a byproduct, requiring exact knowledge of the thermal and chemical properties of this gas at conditions that far exceed those in the atmosphere. Roy then denigrates this honorable scientist in the same email thread.....

“an expert in rocket propulsion should have no particular expertise in atmospheric radiative transfer”

Proving his expertise on **strawman debates**, Spencer assert that scientists claiming NO WARMING, believe in Atmospheric Pressure warming, based on one, discredited blogger at Principia Scientific. The heat transfer equation is...

$(\text{Mass}) \times (\text{Specific Heat}) \times (\text{Temperature Difference}) = \text{Heat Transfer}$

Pressure effects Mass, but static pressure, at any pressure, does not create heat. Then in the Science and Environmental Policy Project newsletters Spencer makes these two claims...

“Temperature of anything...can be increased in one of two ways (1) by adding more energy (2) by reducing energy loss” ~ July 23, 2016

“Spencer....stated that the greenhouse effect is not warming per se, but a reduction in the rate of cooling” ` Aug 06, 2016

In fact, **delayed cooling is NOT warming**, and no mass will increase temperature by adding insulation. No reflected energy emitted by a mass will increase the temperature of the mass. The climate debate is a rigged, three sided FAKE debate where the Alarmist BIG Warmists are given total credibility and the Luke LITTLE Warmists are given enough media exposure to create the illusion of debate. Classical Thermodynamics disproves both of these absurd positions as covered in my multiple articles and the fine research by the many scientists at Principia Scientific International. The Luke Little charlatans complain of the Alarmist gate-keeping and stonewalling, but are equally guilty in denying debate with the reasoned NO Warmists. At the Heartland IPCC-9 convention in La Vegas, July 2014 I met Dr Arthur Viterito, and reviewed his excellent analysis of geothermal forcing [6] which is a position I have supported since my “Motive Force for All Climate Change” was posted at Climate Realists, May 2009. On May 2016 I attended the laughable “Climate Hustle” movie by Marc Morano, where he attempted to refute a flawed anecdotal hypothesis with anecdotal evidence. This science-free self aggrandizement had been in production for years, and Marc had been warned to represent all sides, which he willfully failed to do.

On September 8 & 9, 2016 there will be a Geo-ethics Conference in London and several NO Warmist bits of evidence will be presented. Empirical Truth is intuitive, self amplifying and irrepressible. Soon humanity will awaken to the massive fraud that exists in multiple branches of science and a Second Renaissance will sweep the planet. The Little Warmists will then bear the blame for their duplicitous involvement in the false dichotomy of Carbon forcing fraud. We will know that the elitist Dystopia nightmare has ended when all humanity finally knows Truth, there is NO Carbon climate forcing, not even a Luke little bit of warming.

Joseph A Olson, PE
